

**CSR Research Colloquium – Polychromy & gilding**

---

**“Pigments and gold in Gandharan  
stone and stucco sculptures”**

**Dr Simona Pannuzi**  
(MIBACT, Italian Institute for the Conservation  
and Restoration, Rome)

Two years ago, the Italian Institute for the Conservation and Restoration started a new research project on the polychromy and gilding of Gandharan stone and stucco sculptures and on technological and conservation issues.

The project is in collaboration with the Museum of Oriental Art “Giuseppe Tucci” of Rome and the Italian Archaeological Mission in Pakistan. In the last few months this research provided new interesting results in collaboration with other Museums and the Italian Archaeological Mission in Afghanistan.

The colloquium takes place on **Wednesdy 27 July** from 2 to 3 pm in the WCEC Atrium.

All staff are welcome but please notify Michela Spataro (CSR: x8342) if you plan to come along so that sufficient seating can be provided.
